Hi Tom:

I am hopeful to hear back from you for a meeting opportunity; we obviously missed today. Please let me know what your schedule is like early next week, and we'll try to pull the right folks together for a discussion.

Thanks,
Dave

Joyce - Thanks for your reply; and we recognize this condition of the Env. Covenant.

Hi David - For your meeting today, I would just remind everybody that the Environmental Covenant requires that soils with any detectable amphibole asbestos from the site be handled as ACM. The one percent rule does not apply. Please contact me with any questions.

Joyce Ackerman, On-Scene Coordinator

Subject: Meeting to discuss SLC Hotel Development & Arsenic in Soil - Thursday Afternoon (?)

Hello Tom:

I am writing this email in follow up to my VM message today. I would like to ask if you are available for a visit on the subject project that we have discussed during the past month. We are available early Thursday (Nov. 3) afternoon (e.g., 1 pm) if that would work for you and your management. I would also suggest we invite Greg Sorenson and/or others at the UDEQ with whom you work, and who you may like to have present to discuss the disposal of soil containing Libby amphibole asbestos at the SLV Landfill. I am copying Craig Barnitz as he is the UDEQ's (DERR) lead that is reviewing the Site Work Plan for this redevelopment project; Although I do not feel Joyce Ackerman from EPA would need to attend, I am copying her for informational purposes.

Per our prior conversations, I believe there are two key issues we will want to discuss (and perhaps others), after first discussing the project background to bring everyone up to speed on the proposed project:

1. Nature of asbestos (in soil matrix) and special conditions for packaging, transport and disposal at SLV Landfill.
2. Price for disposal

Please let us know if Thursday will work for you.

Thanks,
Dave Wilson
